

THE DAILY MOOD LOG (continued)

Automatic Thoughts	Distortions	Rational Responses

STEP FOUR: OUTCOME—Re-rate your belief in each Automatic Thought from 0 to 100 and put a check in the box that describes how you now feel:

not at all better; somewhat better; quite a bit better; a lot better.

CHECKLIST OF COGNITIVE DISTORTIONS*

1. All-or-nothing thinking: You look at things in absolute, black-and-white categories.
2. Overgeneralization: You view a negative event as a never-ending pattern of defeat.
3. Mental filter: You dwell on the negatives and ignore the positives.
4. Discounting the positives: You insist that your accomplishments or positive qualities "don't count."
5. Jumping to conclusions: (A) Mind reading—you assume that people are reacting negatively to you when there's no definite evidence for this; (B) Fortune-telling—you arbitrarily predict that things will turn out badly.
6. Magnification or minimization: You blow things way up out of proportion or you shrink their importance inappropriately.
7. Emotional reasoning: You reason from how you feel: "I feel like an idiot, so I really must be one." Or "I don't feel like doing this, so I'll put it off."
8. "Should statements": You criticize yourself or other people with "shoulds" or "shouldn'ts." "Musts," "oughts," and "have tos" are similar offenders.
9. Labeling: You identify with your shortcomings. Instead of saying "I made a mistake," you tell yourself, "I'm a jerk," or "a fool," or "a loser."
10. Personalization and blame: You blame yourself for something you weren't entirely responsible for, or you blame other people and overlook ways that your own attitudes and behavior might contribute to a problem.
