

The M \_\_\_\_\_ N \_\_\_\_\_

\_\_\_\_\_ is a \_\_\_\_\_ number, yes it is,  
it's a \_\_\_\_\_ number,  
somewhere in the ancient, mystic trinity,  
you get \_\_\_\_\_ as a \_\_\_\_\_ number,  
the past and the present and the future,  
faith hope and charity,  
the heart and the brain and the \_\_\_\_\_,  
give you three as a magic number.

it takes three \_\_\_\_\_ to make a tripod, or to make a \_\_\_\_\_ stand.  
it takes three wheels to make a vehicle called a tricycle,  
ev'ry triangle has three corners; ev'ry triangle has three sides,  
no more, no less; you don't have to guess,  
when it's three, you can see it's a \_\_\_\_\_ number.

a \_\_\_\_\_ and a woman had a \_\_\_\_\_ baby.  
yes they did,  
they had three in the \_\_\_\_\_,  
and that's a \_\_\_\_\_ number.

three, six, nine, twelve, fifteen, eighteen,  
twenty-one twenty-four, twenty-seven, thirty.

three, six, nine, twelve, fifteen, eighteen,  
twenty-one twenty-four, twenty-seven, thirty.

three times ten is \_\_\_\_\_, three times nine is \_\_\_\_\_,  
three times eight is \_\_\_\_\_, three times seven is \_\_\_\_\_,  
three times \_\_\_\_\_ is eighteen, three times \_\_\_\_\_ is fifteen,  
three times four is \_\_\_\_\_, and three times three is \_\_\_\_\_,  
and three times \_\_\_\_\_ is six, and three times \_\_\_\_\_ is three, of course.

three times one: what is it? \_\_\_\_\_!  
that's a \_\_\_\_\_ number.

a man and a woman had a little \_\_\_\_\_,  
yes they did,  
they had three in the \_\_\_\_\_,  
and that's a \_\_\_\_\_ number.

man	family (x2)	three (x4)	body	baby
