

The simplest form of fractions

Make these fractions equivalent by putting a number in the box.

$$\frac{25}{30} = \frac{\square}{6} \qquad \frac{4}{12} = \frac{\square}{3}$$

Make these fractions equivalent by putting a number in each box.

$$\frac{2}{3} = \frac{\square}{6}$$

$$\frac{2}{3} = \frac{\square}{9}$$

$$\frac{2}{3} = \frac{\square}{12}$$

$$\frac{2}{3} = \frac{\square}{15}$$

$$\frac{2}{3} = \frac{\square}{18}$$

$$\frac{2}{3} = \frac{\square}{21}$$

$$\frac{2}{3} = \frac{\square}{24}$$

$$\frac{2}{3} = \frac{\square}{27}$$

$$\frac{3}{4} = \frac{\square}{8}$$

$$\frac{3}{4} = \frac{\square}{12}$$

$$\frac{3}{4} = \frac{\square}{16}$$

$$\frac{3}{4} = \frac{\square}{20}$$

$$\frac{3}{4} = \frac{\square}{24}$$

$$\frac{3}{4} = \frac{\square}{28}$$

$$\frac{3}{4} = \frac{\square}{32}$$

$$\frac{3}{4} = \frac{\square}{36}$$

$$\frac{5}{10} = \frac{\square}{2}$$

$$\frac{5}{10} = \frac{\square}{5}$$

$$\frac{5}{10} = \frac{\square}{10}$$

$$\frac{5}{10} = \frac{\square}{15}$$

$$\frac{5}{10} = \frac{\square}{20}$$

$$\frac{5}{10} = \frac{\square}{25}$$

$$\frac{5}{10} = \frac{\square}{30}$$

$$\frac{5}{10} = \frac{\square}{35}$$

$$\frac{6}{8} = \frac{\square}{4}$$

$$\frac{6}{8} = \frac{\square}{2}$$

$$\frac{6}{8} = \frac{\square}{16}$$

$$\frac{6}{8} = \frac{\square}{24}$$

$$\frac{6}{8} = \frac{\square}{32}$$

$$\frac{6}{8} = \frac{\square}{40}$$

$$\frac{6}{8} = \frac{\square}{48}$$

$$\frac{6}{8} = \frac{\square}{56}$$

Make these sets of fractions equivalent by putting a number in each box.

$$\frac{1}{2} = \frac{\square}{4} = \frac{1}{2} = \frac{\square}{6} = \frac{1}{2} = \frac{\square}{8} = \frac{1}{2} = \frac{\square}{10}$$

$$\frac{1}{3} = \frac{\square}{6} = \frac{1}{3} = \frac{\square}{9} = \frac{1}{3} = \frac{\square}{12} = \frac{1}{3} = \frac{\square}{15}$$

$$\frac{1}{4} = \frac{\square}{8} = \frac{1}{4} = \frac{\square}{12} = \frac{1}{4} = \frac{\square}{16} = \frac{1}{4} = \frac{\square}{20}$$

$$\frac{1}{5} = \frac{\square}{10} = \frac{1}{5} = \frac{\square}{15} = \frac{1}{5} = \frac{\square}{20} = \frac{1}{5} = \frac{\square}{25}$$

$$\frac{1}{6} = \frac{\square}{12} = \frac{1}{6} = \frac{\square}{18} = \frac{1}{6} = \frac{\square}{24} = \frac{1}{6} = \frac{\square}{30}$$

$$\frac{1}{7} = \frac{\square}{14} = \frac{1}{7} = \frac{\square}{21} = \frac{1}{7} = \frac{\square}{28} = \frac{1}{7} = \frac{\square}{35}$$
