

1. Multiplication tables

Write the result.

$2 \times 1 = \dots\dots\dots$

$2 \times 2 = \dots\dots\dots$

$2 \times 3 = \dots\dots\dots$

$2 \times 4 = \dots\dots\dots$

$2 \times 5 = \dots\dots\dots$

$2 \times 6 = \dots\dots\dots$

$2 \times 7 = \dots\dots\dots$

$2 \times 8 = \dots\dots\dots$

$2 \times 9 = \dots\dots\dots$

$2 \times 10 = \dots\dots\dots$

$3 \times 1 = \dots\dots\dots$

$3 \times 2 = \dots\dots\dots$

$3 \times 3 = \dots\dots\dots$

$3 \times 4 = \dots\dots\dots$

$3 \times 5 = \dots\dots\dots$

$3 \times 6 = \dots\dots\dots$

$3 \times 7 = \dots\dots\dots$

$3 \times 8 = \dots\dots\dots$

$3 \times 9 = \dots\dots\dots$

$3 \times 10 = \dots\dots\dots$

2. Colour the answers which are same with similar colour.

For example : $2 \times 5 = 10$ or $5 \times 2 = 10$

$2 \times 8 = \dots 16 \dots$

$3 \times 9 = \dots\dots\dots$

$2 \times 2 = \dots\dots\dots$

$7 \times 2 = \dots\dots\dots$

$9 \times 3 = \dots\dots\dots$

$8 \times 3 = \dots\dots\dots$

$2 \times 7 = \dots\dots\dots$

$7 \times 3 = \dots\dots\dots$

$8 \times 2 = \dots 16 \dots$

$5 \times 3 = \dots\dots\dots$

$4 \times 5 = \dots\dots\dots$

$5 \times 4 = \dots\dots\dots$

Note: We get the same answer on multiplication even if the order of the number is changed.
