

My shadow and me

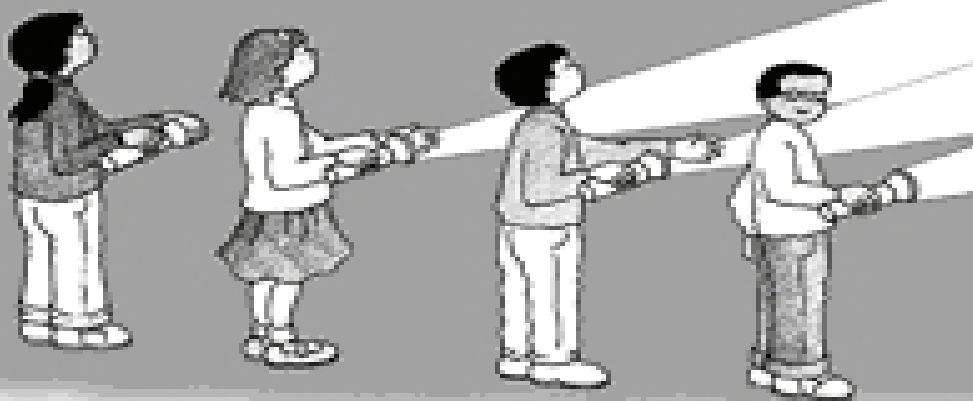

Observations

When you shine a flashlight at a wall, the wall seems brighter. If you put your hand over the flashlight, it blocks all the light, and the wall stays dark. If you hold your hand between the flashlight and the wall, you make a shadow. The closer your hand is to the flashlight, the bigger the shadow.

Science activity

Which of the children will make the largest shadow? Circle that child's name.

Jo

Kate

Tom

Ben

Science exploration

Use a flashlight and different toys to make shadows on the wall. Make the shadows bigger and smaller.
