# 6th Grade Social Studies Year Long Plan

#### August

## Introduction to Geography

## **Elements of Geographical Study and Analysis**

- Knowledge of major elements of geographical study and analysis (such as location, place, movement, regions) and their relationship to changes in society and the environment
- Use geographic research sources to acquire and process information to answer questions and solve problems

Construct maps

- o Locate major cities and nations of the world
- o Locate the world's continents, oceans and major topographic features
- Locate and describe geographic places, using absolute and relative location
- Describe physical characteristics, such as climate, topography, relationship to water and ecosystems
- Describe human characteristics, such as people's education, language, diversity, economies, religions, settlement patterns, ethnic background and political system
- Describe major patterns of population distribution, demographics and migrations in the world and the impact of these patterns on cultures and community life
- Identify world-wide patterns of resource distribution
- Identify how technology and culture influence resource use
- Identify environmental consequences of how people use resources
- Identify the effect of natural forces upon human activities
- Describe trade patterns, explaining how supply and demand influence movement of goods and services, human, natural and capital resources
- Compare regions and predict how human life in one region in the world would differ from that in another
- o Use geography to interpret the past, explain the present and plan for the future

## **Tools of Social Science Inquiry**

- 7. Knowledge of the use of tools of social science inquiry (such as surveys, statistics, maps and documents)
  - Use maps, graphs, statistical data, timelines, charts and diagrams to interpret, draw conclusions and make predictions
