

Use of these structural members to form frames are called **space frames**. They consist of members that rest on the ground. In fact, most, but not all, bridges are actually space frames.

The bridge figure on the left is a simple figure. The figure on the right is a more complex figure. Below the callout box is a block of text.

Fig. 1. Bridge structure. The figure on the left is a simple figure. The figure on the right is a more complex figure.
