

Guess My Number (2 or more players)

Materials: Paper and pencil

Goal: Guess the secret number.

Write the following on the piece of paper.

Guess	#	Place

Choose one person (the clue giver) to think of a two digit number, but both digits cannot be the same, like 11, 22, 33, etc.

The other players take turns guessing the number. When they guess a number, the clue giver writes the number under the Guess column. If the number has one correct digit, then write a "1," under the # column. If the digit is also in the right place, write a "1" under the place column as well; if it's not, write "0" in the place column. If no digits are correct, write "0" in each column. If the number is correct, write "2" in each column. The person who guesses the number becomes the next clue giver.

Example:
Secret
Number is
53

Guess	#	Place
46	0	0
37	1	0
72	0	0
13	1	1
53	2	2
