Elements of Art

SPACE

The element of space is used to create the illusion of depth.

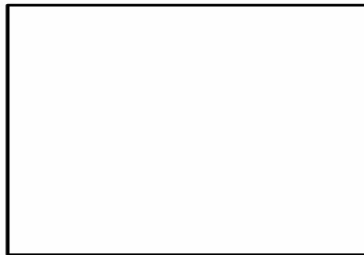

Artists use several techniques to create the illusion of depth within two dimensional artwork.

Draw the example of how each method look like!

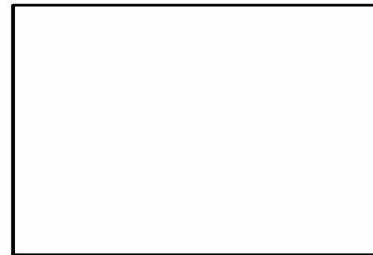

PLACEMENT

Objects that are farther away are placed closer to the horizon line.

VALUE & FOCUS

Objects that are far away appear lighter in color and less clear than objects that are close.

SIZE

Objects that are far away appear smaller. Objects that are close to the viewer appear larger.

PERSPECTIVE

Depth can be created through the use of one vanishing point. (A.K.A. one point perspective)

OVERLAP

Shapes in the distance will be overlapped by shapes that are closer.

OVERLAP

Shapes in the distance will be overlapped by shapes that are closer.
