

HOW TO DRAW A TOTEM POLE

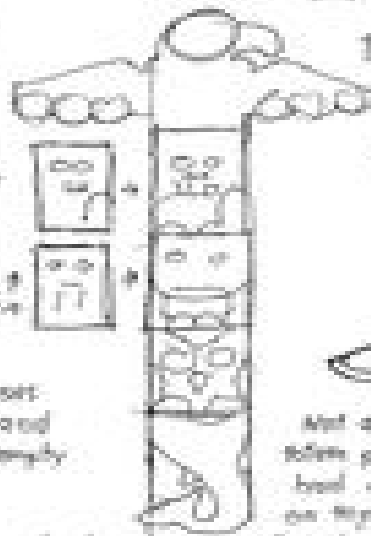

Start by drawing a basic shape, like a tall rectangle.

Every totem pole is different, so choose what you want on yours. Use a light pencil at first to work out your designs.

The designs fit inside the squares or rectangles of the totem pole. The designs can be faces of people or animals.

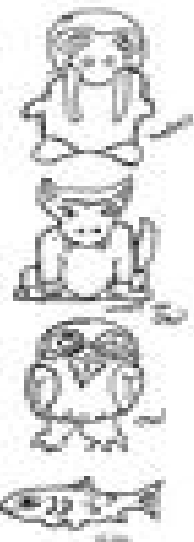

work out your ideas

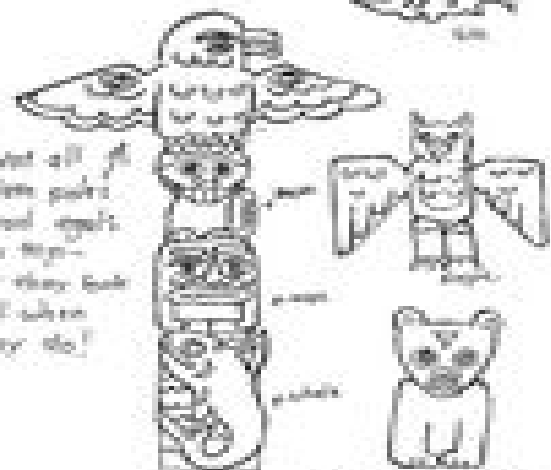

The style of art uses lines drawn lines, and shapes inside any empty space.

After you have worked out all your ideas, go over your drawing with a marker or colored pencils. Use brown, black, red, white, and very little blue.

Totem poles tell a story or describe a family - make yours your own!

Not all totem poles have eyes on top - but they look cool when they do!
