

## QUESTIONS

1. Explain your definition of "diversity" on the 1990-91, as if you are explaining the concept to a group of "middle management" employees and the questions that you should present about the definition.

2. In the 1990-91 survey, the term "diversity" was defined (and used) exactly as it is used in this assignment. How do you think the business world today (in a positive regard) is different from 1990-91? Why? What do you think of the way of categorizing people?

3. If you were a manager, would you fight against some natural limitations or conditions that you face? Why or why not?

4. How do you think you fit in the category? Have you had a similar experience to yours? How?

5. If you are a manager, would you actively implement your own definition of diversity? Why or why not?

6. Should schools do "diversity education" (like in diversity classes and general diversity) why or why not?

These questions are intended to be used as a guide, but do not have to be followed exactly, and there can be to fully answer each question.
