

Periodic Table of Elements

The image shows a blank periodic table grid on a white background with rounded corners. The grid is composed of several rows and columns of empty boxes. The structure is as follows:

- Row 1: 2 boxes (Group 1 and Group 2).
- Row 2: 2 boxes (Group 1 and Group 2).
- Row 3: 2 boxes (Group 1 and Group 2).
- Row 4: 18 boxes (Groups 1 through 18).
- Row 5: 18 boxes (Groups 1 through 18).
- Row 6: 18 boxes (Groups 1 through 18).
- Row 7: 18 boxes (Groups 1 through 18).
- Row 8: 18 boxes (Groups 1 through 18).
- Row 9: 18 boxes (Groups 1 through 18).

A dashed line is drawn between the second and third boxes of Row 6 and Row 7, extending downwards to the first two boxes of Row 8 and Row 9. This indicates the placement of the lanthanide and actinide series.
