

If you need to find the complete manufacturing history of a Chapron car, please, contact us! We do have the manufacturing data from the 1920s listed in our books as well as most of the files attached to the manufacturing of a specific automobile starting in the late 1930s. We do deliver certificates of authenticity on original letterhead.

Lately, in the US, a 1949 Delahaye 135M convertible was sold for \$250,000 at an auction. The car had 3 carburetors, its original light metallic blue grey paint, original luxury red interior with pleated seats, a new top, now beige, originally grey. This car, with very few miles, is very interesting! It is in an extraordinary shape and a beautiful sample of Chapron's classic work! The seller ordered from us , file that used to follow the manufacturing of a body at Henri Chapron's business. From the time the chassis entered the factory to the time it was delivered to its first owner, the "fiche d'atelier" (cardboard depicting all the technical details of the manufacturing particular to the specific car, listing the paint colors, the leather and precious woods used) was attached to the wheel of the automobile. Please, look at the car on the following sites:
