### ENDANGERED SPECIES THEME

*Please show your work.*

1. If a tiger can hunt two deer per day, how many can it hunt in four days? How many in five? How many in six?

2. Biologists are raising endangered black-footed ferrets in captivity. If each team can successfully raise five black-footed ferrets, how many can three teams raise? How many can four teams raise? How many can five teams raise?
3. Marine biologists are tagging right whales. If one team of biologists can tag ten right whales per day, how many can four teams tag? How many can five teams tag? How many can six teams tag?
4. Park rangers count two African dwarf crocodiles per mile of river. How many do they count in five miles of river? How many in six? How many in seven?
5. Scientists count ten gorillas per extinct volcano in a rain forest in Africa. How many do they count on three volcanoes? How many on four? How many on five?
