

# SPACE

Here are 8 ways that you can use 3D tricks to create the illusion of space.

1. Show the **HORIZON**
2. **Size**

When the size is smaller and it is placed closer to the horizon it looks farther away.
3. **PLACEMENT**
4. Show the **SIDES**
5. Use an **ELLIPSE**  
Which looks like a circle lying on its side.
6. **Shadows**
7. **SHADING**
8. **OVERLAP**

Make a drawing that shows space.  
Check off the tricks that you used to create the illusion of space.

<input type="checkbox"/> Horizon	<input type="checkbox"/> Ellipse
<input type="checkbox"/> Size	<input type="checkbox"/> Shadows
<input type="checkbox"/> Placement	<input type="checkbox"/> Shading
<input type="checkbox"/> Sides	<input type="checkbox"/> Overlap

# TEXTURE

Can you create a texture with just your pencil? Try some in the boxes below the examples.

On a new page, create textures with your pencil, a pen, marker, crayons, texture rubbings or any other media you have available. Use the words below and any other that you can think of to label your textures.

- |               |                |               |
|---------------|----------------|---------------|
| <b>Soft</b>   | <b>Grooved</b> | <b>Hairy</b>  |
| <b>Rough</b>  | <b>Prickly</b> | <b>Fuzzy</b>  |
| <b>Fuffy</b>  | <b>Jagged</b>  | <b>Smooth</b> |
| <b>Gritty</b> | <b>Bumpy</b>   | <b>Slick</b>  |

Add your favorite textures to the word **TEXTURE**
