Worksheet 2-2-1 ~ Graph y=mx+b (Slope-Intercept Form)

Note: to graph an equation in y = mx + b form, remember that:

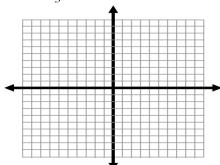

•
$$m = slope = \frac{rise}{run} = \frac{\Delta y}{\Delta x}$$

• $b = y\text{-intercept} = (0, b)$

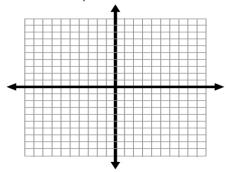

•
$$b = v$$
-intercept = $(0, b)$

Simplify and graph the following equations (Label your Points!):

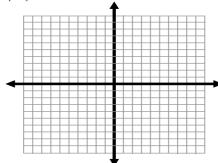

1)
$$y = -\frac{2}{3}x - 7$$

2)
$$y = \frac{3}{4}x + 5$$

3)
$$y = -3x - 6$$

4)
$$y + 2x = 5$$
