

Math Games Teacher Guide

Math Games are engaging and enjoyable ways for children to explore math and master basic math facts. Math Games offer fun, hands on ways to practice math vocabulary in a setting that allows children to transfer skills they learn in class! *Geometry Vocabulary Trading Cards* will help your students practice and reinforce their math vocabulary through play.

Package Contents:

This package consists of:

- 15 Trading Cards (words with definitions)
- Vocabulary Word Study Questions

We also have included:

- Concentration Word and Definition Cards

All the above mentioned are reproducible.

Easy Assembly:

Assembly is easy!

Simply copy the trading cards onto perforated business card paper, colored index or construction paper. Cut the cards. Make one copy of the Geometry Vocabulary Study Questions for each student.

For concentration games copy the word and the word definition game cards onto colored construction paper or index paper. Cut them into individual cards.

Use colored file folders to color code your Math Games according to the math concept (Multiplication-red, Measurement-blue, Geometry-yellow).

Keep the cards in a plastic baggie and store it all together in a file folder or large manila envelope for easy storage.

Watch Test Scores Soar Through Play

Math Games offer a hands on, developmentally appropriate way to increase competency, comprehension and retention of the lessons you are teaching in class. Math Games are a perfect way to supplement your math lessons. Use Math Games whole class or at a Math Game center and watch your test scores soar.
