

Dangers of Electricity

Name:

1. Don't try to get things out of a sub-station. Electricity can jump gaps and kill you if you get too close.
2. Don't climb up pylons or poles carrying overhead wires.
3. Don't throw objects at power lines.
4. Don't play in empty buildings. If the electricity has not been cut off, it could kill you.
5. Don't play with vandalised street lights.
6. Don't climb a tree or wave a stick near power lines.
7. Don't interfere with damaged electrical equipment.
