

How to Draw a Raccoon

Start out by drawing lightly so you can erase later.

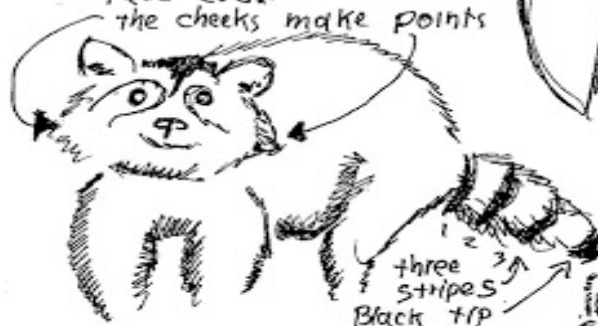

use an oval for the head, and a large oval for the body.
the head is low on the body.

the two front legs are curved lines bending outward from each other
the back leg is like a triangle.

the ears are like rounded triangles on top of the head

use guidelines to keep the features of the face even.
the cheeks make points

the tail is like an oval

the eyes are above the half way line.
the nose is like a rounded triangle pointing down with

two dashes going across, and a line going down

Leave a shiny spot in each eye
the mask is two parts one for each eye. the mask points downward.

the feet are hidden in the grass.

use short lines for the fur,
use shading to give roundness
