

Name _____

Dividing without remainders—
2-digit dividends

Keep on Dividing

Use these steps when dividing with greater dividends.

1. Divide the tens digit in the dividend by the divisor. Write the answer above the tens digit.

$$4 \overline{) 84}$$

2. Multiply the partial quotient by the divisor. Write the answer below the tens digit. Subtract. Bring down the ones digit.

$$\begin{array}{r} 2 \\ 4 \overline{) 84} \\ \underline{-8} \downarrow \\ 04 \end{array}$$

3. Divide the ones digit by the divisor. Write the answer above the ones digit. Multiply. Subtract.

$$\begin{array}{r} 21 \\ 4 \overline{) 84} \\ \underline{-8} \downarrow \\ 04 \\ \underline{-4} \\ 0 \end{array}$$

Divide.

A. $3 \overline{) 66}$

$2 \overline{) 48}$

$3 \overline{) 93}$

$3 \overline{) 39}$

B. $3 \overline{) 96}$

$3 \overline{) 63}$

$2 \overline{) 68}$

$9 \overline{) 90}$

C. $3 \overline{) 99}$

$3 \overline{) 69}$

$2 \overline{) 80}$

$5 \overline{) 55}$
