

Be forceful!

Observations

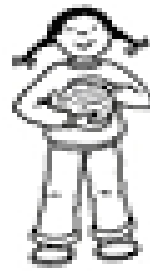

A push is a force. A pull is also a force. Forces can make things move. They can also slow things down. Some forces can make things move fast. They can make some things move faster than others.

Science activity

Samantha is playing with a ball. Color in the pictures where she is making the ball move fast.

kicking

holding

throwing

bouncing

sitting

Which activity makes the ball go the fastest? _____

Science exploration

Drop marbles from different heights onto flattened clay or playdough. What happens to the clay?
