

Task 1

The Egyptian Nile

Almost all the population built its houses along the Nile. They were built on the banks of the Nile and on the Mediterranean sea. The water on the Nile was very good because, July and August, in the summer, comes the water from the high mountains. When the water level is high, the river fills a layer of black soil. Without any help from the Egyptian government, the Nile flood had the effect of fertilizing the soil. The Egyptian did not know why the water from the high mountains was so good. They did not know the following things:

1. The water of the high mountains is called the Nile water. It is called Nile water because of the water. One day the Nile water had a terrible smell. The Nile water was very bad in 1885. He found the water was very bad because of the Nile water. He found the water was very bad because of the Nile water.

- What is the Nile water called?
- a) Nile water
 - b) Nile water
 - c) Nile water
 - d) Nile water

What is the Nile water called? The Nile water is called Nile water.

What is the Nile water called? The Nile water is called Nile water.

What is the Nile water called? The Nile water is called Nile water.

The Nile River has always been very important to the people of Egypt. They were probably the first to use the Nile water. The Nile water was very good because of the water. One day the Nile water had a terrible smell. The Nile water was very bad in 1885. He found the water was very bad because of the Nile water. He found the water was very bad because of the Nile water.
