Objective: When you have completed this worksheet you should know how to take minimal informations about a line and write the 'y=mx+b' model, find the slope of the line, find points on the line, and graph the line.

Using the information, fill in the table, make a graph, and find the general or standard form of the equation.

1. (1, 3) and (4, 6)

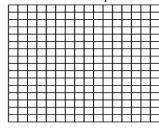

Α.	v	_

 $\Delta Y =$ 

m=

y=mx+b is

$\Delta Y^*X/\Delta X =$	Χ/ ΔΧ* =	X	Y

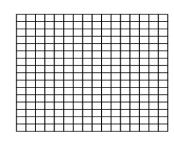

2. (0, -3) and (2, 1)

4.37

$\Delta X =$	
$\Delta Y =$	
m=	
y=mx+b is	

$\Delta Y * X / \Delta X =$		Χ/ ΔΧ* =	X	Y
	l			

3. (-4, 5) and (-2, 1)

 $\Delta X =$ 

 $\Delta Y =$ 

m=

y=mx+b is

y=111X 1 O 13

$\Delta Y^*X/\Delta X =$	Χ/ ΔΧ* =	X	Y
