AN INDECENT CHICKEN?

Read the true story below, then make an inference based on the evidence in the story.

One of the major costs of processing chicken for sale is the expense of removing the feathers before the chickens can make it to our dinner plate. **Most people prefer eating their chicken without having to pick feathers out of their teeth. **Scientists set to work and in 1975, they came up with a featherless chicken. *But this new type of naked chicken never caught on with chicken growers because they soon were presented with another problem that added to their costs. **Can you deduce what the new problem was?

Your conclus	sion:					
Write the nu	mber of the se	ntence that b	est supports	your answer.
