**Addition & Subtraction: Multi-Step Problems**

**Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

**Question 1**

It was Milly's birthday. As her family had a huge appetite, her mother baked 538 desperate turkeys. After that she baked 217 more screeching orangutans than turkeys. She also baked 324 fewer shrieking zebras than orangutans. How many delicious animals did Milly's mother bake for her daughter's wonderful birthday party?

**Question 2**

Wartold the Wizard opened a magic shop yesterday. He had three items that were popular with his customers - fresh tadpole tails, pickled mermaid eyes and fried hillbilly fingers. At the end of the day he had sold 2355 fresh tadpole tails. He had also sold 1628 more pickled mermaid eyes than fried hillbilly fingers. If he had sold 287 fewer fried hillbilly fingers than fresh tadpole tails, how many items did he sell altogether?
