

Singapore 3rd Grade Math Worksheet: 3
Addition & Subtraction: If/Then & Comparison Model Approach

Name: _____

Date: _____

Math Problem 1

Tommy Tiger and Lucinda Lion were tired of working in the circus. They escaped from the circus and began to catch ringmasters and lock them in cages. By the time they were finished, Tommy had 70 more caged ringmasters than Lucinda. Tommy then gave Lucinda 15 ringmasters because his cage was overcrowded. How many more caged ringmasters than Lucinda did he have after that?

Math Problem 2

Itch and Scratch are two mangy dogs. Itch had 125 more fleas on its body than Scratch. When Itch decided to take a bath, 25 of the fleas from Itch jumped onto Scratch. How many more fleas than Scratch does Itch have now?
