

## One-point Linear Perspective

### Exercise One: On the Road

1. Draw a horizontal line across your page.  
This will be your **horizon line**.

2. Add a point on the center of the horizon line.  
This will be your **vanishing point**.

3. Draw two diagonal lines that start at the vanishing point and end at the edge of your paper— this is your road.

4. Let's add some poles. Add two vertical poles that intersect the horizon line.  
**Don't forget to keep your ruler straight!**

5. Add guidelines from the top of the poles to the vanishing point.

6. Add some more poles— these must fit within the guidelines you have drawn.

7. Add more features to your drawing— maybe some lines on the road, some mountains in the background. See if you can draw a car!

8. Add some colour.

**Tips:** Things that are far away appear smaller and less focused, and bright colours look closer.  
**Always remember to keep your ruler straight for those horizontals and verticals!**
