

Name: _____

Wednesday

Math Practice: Two-Step Word Problems (3.OA.8) & Identify Arithmetic Patterns (3.OA.9)

Solve.

1. $5 \times 8 - 21 =$ _____

2. $10 + 2 + 42 =$ _____

3. $(30 + 5) + q = 7$ $q =$ _____

4. $11 \times 5 + q = 60$ $q =$ _____

(3.OA.8) Write an equation and find the solution.

Timothy has 2 bags of jelly beans. Each bag consists of 9 large jelly beans. His mom gave him 5 more large jelly beans. How many jelly beans does he have now?

Equation: _____

Answer: _____

Joseph had 11 packages of skittles. Each package had 10 skittle pieces. He gave 20 skittle pieces to his best friend. How many skittle pieces did he have left for himself?

Equation: _____

Answer: _____

Sarah is reading 5 books at the same time. Each book has 8 pages. If she reads 10 pages a day, how long will it take her to read all 5 books?

Equation: _____

Answer: _____

Patricia has 9 boxes of erasers. Each box holds 11 erasers. She gets 9 more erasers from her teacher. How many erasers does Patricia have?

Equation: _____

Answer: _____

(3.OA.9) Identify Arithmetic Patterns. What is the missing number?

Input	Output
3	0
5	2
7	4
13	?

? = _____

Rule: _____

Input	Output
77	7
55	5
44	4
11	?

? = _____

Rule: _____
