

Try adding these amounts of money in pence.  
Then write the total again in pounds.  
I have done one for you.

Example  $50p + 20p =$    $=$

1.  $50p + 10p =$    $=$

2.  $30p + 40p =$    $=$

3.  $60p + 20p =$    $=$

4.  $35p + 25p =$    $=$

5.  $45p + 15p =$    $=$

Remember to leave out the pence sign if you write the pounds sign.

These are a little bit harder!

6.  $32p + 28p =$    $=$

7.  $43p + 17p =$    $=$

8.  $54p + 16p =$    $=$

9.  $56p + 12p =$    $=$

10.  $67p + 13p =$    $=$

11.  $48p + 23p =$    $=$

12.  $36p + 56p =$    $=$

You may need to make some 'jottings' here to help with the adding up.
