

Division with Diagrams

Name _____ Score _____

Directions: Draw a diagram to show how to solve each division problem. Look at the example below.

Example $28 \div 7 = \underline{4}$

First, make 28 tally marks.
Next, circle groups of 7 tally marks until there are no tally marks remaining.
Last, count the number of groups to find the answer.

1. $15 \div 3 = \underline{\quad}$

2. $25 \div 5 = \underline{\quad}$

3. $36 \div 9 = \underline{\quad}$

4. $42 \div 7 = \underline{\quad}$

5. $81 \div 9 = \underline{\quad}$

6. $44 \div 4 = \underline{\quad}$
