

Multiple choice

Question 1 An instructor would use the following three factors to assess and measure all students:

1. Strong prior mathematical concepts and knowledge
2. Current mathematical knowledge and skills
3. Effective time management and study habits
4. The student's current mathematical learning goals
5. Current mathematical learning environment
6. Current mathematical learning environment
7. Current mathematical learning environment
8. Current mathematical learning environment
9. Current mathematical learning environment

Question 2 Some of the following could be considered as factors that affect the student's learning and study habits:

1. The student's current mathematical learning goals
2. The student's current mathematical knowledge and skills
3. The student's current mathematical learning environment
4. The student's current mathematical learning goals
5. The student's current mathematical learning environment
6. The student's current mathematical learning environment
7. The student's current mathematical learning environment
8. The student's current mathematical learning environment
9. The student's current mathematical learning environment
10. The student's current mathematical learning environment

True

Question 3

1. The student's current mathematical learning goals
2. The student's current mathematical knowledge and skills
3. The student's current mathematical learning environment
4. The student's current mathematical learning goals
5. The student's current mathematical learning environment
6. The student's current mathematical learning environment
7. The student's current mathematical learning environment
8. The student's current mathematical learning environment
9. The student's current mathematical learning environment
10. The student's current mathematical learning environment

Question 4 The student's current mathematical learning goals

Question 5

1. The student's current mathematical learning goals
2. The student's current mathematical knowledge and skills
3. The student's current mathematical learning environment
4. The student's current mathematical learning goals
5. The student's current mathematical learning environment
6. The student's current mathematical learning environment
7. The student's current mathematical learning environment
8. The student's current mathematical learning environment
9. The student's current mathematical learning environment
10. The student's current mathematical learning environment
