### Photosynthesis

#### Across

- 4. Most common pigment in photosynthesis
- 7. Original source of all energy in food
- 8. Cells' usable source of energy
- 9. Obtains energy from food & consumes
- 10. Stores energy in storage molecules

#### Down

- 1. One of the reactions used in the Light-Dependent Reaction
- 2. Cycle that uses carbon dioxide to produce glucose
- 3. Product of the Calvin cycle
- 4. Organisms where photosynthesis occurs
- 5. Energy of sunlight is converted to energy of glucose
- 6. Uses light energy from sun to produce food
- 11. Released by the light-dependent reaction
