WS 6.9 Crossword Puzzle

<u>Down</u>

- 1. packets of electromagnetic radiation
- 2. radioisotopes used for medical purposes; they can be detected in the body by their radiation
- 3. an unstable atomic nucleus is
- 4. type of radiation; very high in energy; very powerful
- 6. sub-atomic particle with positive charge
- 8. also known as hydrogen-3
- 9. disastrous meltdown at this Russian power plant
- 10. part of atom where most of the mass can be found
- 11. two atoms of same element with different masses
- 13. discovered radium; coined the term "radioactive"
- 15. particle equivalent to an electron; emitted from unstable nuclei
- 17. radioactive gas found in some homes
- 18. if an oxygen loses a proton, it would become this
- 20. this happens on the sun
- 21. light amplification by stimulated emission of radiation

<u>Across</u>

- 5. particle equivalent to a helium nucleus with very low penetration power
- 12. X-rays are a type of _____ radiation
- 14. sub-atomic particle with a negative charge
- 16. sub-atomic particle with no charge
- form of energy which travels in waves at the speed of light
- a way to express how long it takes a radioactive material to decay
- 22. radioactive metal used in nuclear power plants
- 23. area of the nuclear plant where the chain reaction occurs
- 24. nuclear _____ occurs in atomic weapons
- a radioactive form of this element is used in dating ancient objects
