Ms. Erin Cunningham
Campus Recruiter
Deloitte Consulting
Cincinnati, OH

Dear Ms. Cunningham,

I am writing to submit my application for the Business Analyst position with Deloitte Consulting. Since my first year at Denison, I have known that I want to work for a consulting firm upon graduation. I have always enjoyed studying organizational culture and development, and feel that my experiences from both inside and outside of the class room will enable me to succeed in applying my skills at a much larger level. As part of my course work at Denison, I have earned a certification in Organizational Studies, an integrative curriculum which exposes its participants to the skills needed to thoroughly examine and improve the inner-workings of an established organizational culture. I am confident that after four years at Denison, I am ready to enable change and make a difference at Deloitte.

Through my course work at Denison, I have gained a deep appreciation of a liberal-arts education. In an ever-changing environment, I have been able to learn how to examine problems with a critical and imaginative eye, in a way that I had never before considered and have developed a broad knowledge base and strong critical thinking skills. Specifically, with my work as a Sociology & Anthropology major, I have gained a new insight to social and cultural differences and how to apply them to everyday life.

Outside of my course work, I have gained an invaluable experience by being one of twenty-nine founding fathers to colonize a new Fraternity on campus. As the current president of this colony, I have dedicated a great deal of my time to building up this Fraternity as we work towards becoming a well-rounded, student-oriented organization.
