

# How to Draw a California Golden Poppy flower

Start by drawing lightly so you can erase later.

Draw circles first to get things in the right place.

Don't make the circles perfect.

one behind the other

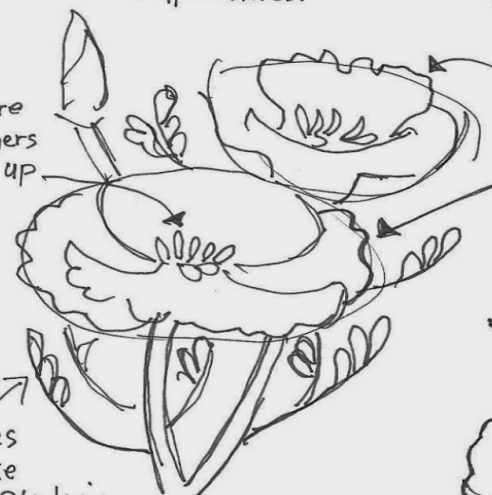

Divide the circles into four petals by drawing curving "u" shaped lines.

the stems are not straight but are slightly bent.

the edges of the petals are wavy.

in the middle are little fingers that go up.

the leaves look like feathers sticking up.
