Solve the equations:

$1 + 4 = \underline{\quad}$	$5 + 2 = \underline{\quad}$	$8 + 0 = \underline{\quad}$
$3 + \underline{\quad} = 9$	$6 + \underline{\quad} = 7$	$\underline{\quad} + 2 = 5$
$\underline{\quad} + 2 = 8$	$\underline{\quad} + 4 = 10$	$0 + \underline{\quad} = 3$

Operational and Algebraic Thinking 2. Students understand that there are equal to (2) sets, point to each. They use any, e.g., to solve algebraic equations and record each solution using the addition or subtraction (e.g.,  $8 + 2 = 10$  and  $10 - 2 = 8$ )
