

1. Solve for y_2 :

$$d = y_2 - y_1$$

$$y_2 = d + y_1$$

2. Solve for b :

$$a = b + c$$

$$b = a - c$$

3. Solve for y_1 :

$$d = y_2 - y_1$$

$$-y_1 = d - y_2$$

$$y_1 = -d + y_2$$
