

**Microscopic and Macroscopic**

**Microscopic view:**

1. Draw the paramecium and fill in gaps with the given words.

Labels indicate the following: draw in the diagram of a paramecium showing the structure of all of its organs, the cilia of the contractile vacuole. Most of the time, there are contractile vacuoles in the animal's body.

When a contractile vacuole is full and then the animal is in a freshwater, following the line of the animal, the vacuole contracts and releases the water.

**Contractile vacuole, contractile vacuole, contractile vacuole, contractile vacuole, contractile vacuole**
