

Name: _____

Physical Changes in Matter

Physical changes in matter occur when the matter changes the way it looks, without becoming a new kind of matter.

Directions: Circle the examples of items that changed physically.

clay rolled into a ball	wood that's been chopped	broken glass
ice melted	fried egg	paper that has been cut
burned wood	rusty iron	fireworks exploded
a crushed can	food spoiled	folded clothes

Directions: Give an example where each property of matter has changed.

size	_____
