

Name: _____

Hollywood's Top Ten

Student Worksheet

After completing your bar graph, answer the following questions:

1) How much more money was made by the top movie than the second one?

2) What year were more top ten movies made?

3) Find the mean gross receipts for the top ten movies. Round off to the nearest million.

Is this average approximately the same as the median?

Why or why not?

4) Why did this web site choose not to adjust their figures for inflation?

5) What category of movie seems to be the most prevalent?

6) If you were a movie producer, what kind of a movie would you want to make to bring in the most money?

Why?
