

PREPARATION OF TIME-ON-TASK

1. The first step in the preparation of time-on-task is to identify the tasks to be performed. This is done by listing all the activities that are part of the job.

2. The next step is to estimate the time required to complete each task. This is done by observing the worker and recording the time taken to complete each activity.

3. The final step is to calculate the total time required to complete the job. This is done by adding up the time for each task.
