

## SORTING PROPERTIES OF MATTER

Some properties of matter are observable and some are measurable.  
Sort the properties into the two categories.

| OBSERVABLE PROPERTIES | MEASURABLE PROPERTIES |
|-----------------------|-----------------------|
|                       |                       |

|             |          |            |         |
|-------------|----------|------------|---------|
| texture     | odor     | mass       | length  |
| weight      | shape    | volume     | density |
| temperature | magnetic | sink/float | state   |
