

Linear Inequalities: Using Graphs and Tables Worksheet Activity 3

1. Exit the Algebra Apps.
2. Enter the graphing mode by pressing $y=$.
3. Delete any equations in $y=$ and press zoom 6 to create a standard window.
4. Answer the following: If x is a real number, draw the number line graph of the following inequality.

$$-2 < x \text{ and } x < 4$$

5. Answer the following: If x is a real number, draw the number line graph of the following inequality.

$$x < -1 \text{ or } x > 3$$

6. Using your graphing calculator check your answers for examples 4 and 5.

Press $y=$
In $y1$ enter $-2 < x \text{ and } x < 4$

(The less than symbol and the word “and” is found in the catalog, press 2nd 0, then scroll until you see $<$ (or the word and), and press enter)
