

Adding and subtracting from 100 questions

Remembering 100 is a number in many ways to do the sums quickly is to add 20 and then subtract 2.

For instance: $42 + 10 = 52$ add 20 to 42 which equals 62.

Then subtract 2

This leaves 60, the correct answer!

Q1-Q2 Use the numbers below, as quickly as you can. Just write the answers down.

1. $643 + 20 =$ _____

2. $447 + 20 =$ _____

3. $500 + 20 =$ _____

4. $450 + 20 =$ _____

5. $127 + 20 =$ _____

6. $117 + 20 =$ _____

7. $200 + 20 =$ _____

8. $300 + 20 =$ _____

9. $750 + 20 =$ _____

10. $707 + 20 =$ _____

11. $432 + 20 =$ _____

12. $700 + 20 =$ _____

13. $800 + 20 =$ _____

14. $700 + 20 =$ _____

15. $170 + 20 =$ _____

16. $1000 + 20 =$ _____

17. $1000 + 20 =$ _____

18. $900 + 20 =$ _____

19. $2000 + 20 =$ _____

20. $1000 + 20 =$ _____

Remembering and using 100 is usually much quicker than trying to add numbers.
Don't be afraid!

Q3-Q4 Now try subtracting 2 from these numbers (subtract 20, add 2)

21. $100 - 2 =$ _____

22. $100 - 2 =$ _____

23. $100 - 2 =$ _____

24. $170 - 2 =$ _____

25. $140 - 2 =$ _____

26. $100 - 2 =$ _____

27. $400 - 2 =$ _____

28. $1000 - 2 =$ _____

29. $1000 - 2 =$ _____

30. $707 - 2 =$ _____
