

I. Principles of behavior modification:

- A. ABC model.
 - 1. Antecedents.
 - 2. Behavior.
 - 3. Consequences.
- B. Discrete trials.
 - 1. Components (5).
 - a. Discriminative stimulus (SD).
 - i. characteristics.
 - b. Response.
 - c. Consequences.
 - i. characteristics.
 - d. Intertrial interval.
 - e. Prompts (optional).
 - 2. Functional Analysis of Behavior.
 - 3. Points to remember.
 - 4. Discrimination training.

II. Prompting:

- A. Rules of use.
- B. Implementation.
- C. Types:
 - 1. Physical.
 - 2. Modeling.
 - 3. Pointing.
 - 4. Visual.
 - 5. Massed trials.
 - 6. Positional.
 - 7. Order of presentation.
 - 8. Dimensional.
 - 9. Verbal.
- D. Advantages.
- E. Disadvantages.

III. Shaping and Chaining:

- A. Shaping.
 - 1. Advantages.
 - 2. Disadvantages.
 - 3. Examples.
- B. Chaining.
 - 1. Backwards.
 - 2. Forward.

IV. Increasing Behaviors:

- A. Reinforcement.
 - 1. Definition.
 - 2. Positive reinforcement:
 - a. Types.
