

Algebra I 1.2, 1.5, 1.6 Quiz Review

Students should look over their homework, class notes, and textbook examples to help them prepare for this quiz.

Topics:

- 1) Order of Operations, Associative, and Commutative Properties**
 - a. Evaluate expressions: $3 + 4 - 8/2$
 - b. "Plug In" or Substitution: $3x + 5y$, when $x = 3$ and $y = -2$
 - c. Use your calculator to assist you in solving
- 2) Distributive Property**
 - a. Express situations using the distributive property
 - b. Combine Like Terms: $3x + 5y - 6x + 2y$
 - c. Simplify expressions: $3(4x - 7)$
 - d. Find the area and perimeter of basic geometric shapes
