

Name: _____

CCSS 2.MD.1 Measure the length of an objectprimer

Measurement

Directions: About how many blocks long is each ice cream cone?

The image shows three ice cream cones of different heights. Each cone is positioned to the left of a vertical bar divided into 10 equal rectangular blocks. The top block of each bar is shaded gray, and the remaining 9 blocks are white. The first cone is the shortest, the second is medium height, and the third is the tallest. Below each bar is a horizontal line for writing the measurement.
