

## NUTRITION AND DIGESTION

A. IDENTIFY WORDS RELATED TO DIGESTION

\_\_\_\_\_

\_\_\_\_\_

B. READ AND WRITE THE CORRECT NUMBER TO PUT THE PARAGRAPH IN ORDER

\_\_\_\_\_ The small intestine absorbs the nutrients in the food. Wavy lines help the small intestine to absorb more nutrients. The rest of the food material passes into the large intestine.

\_\_\_\_\_ when you swallow, the food passes into a long tube called the oesophagus. It takes the food to the stomach.

\_\_\_\_\_ The large intestine absorbs water. The material changes into faeces. Then faeces leave the body through the rectum.

1. Digestion starts in the mouth. You chew the food with your teeth. You move the food with your tongue and mix it with saliva.

\_\_\_\_\_ Your stomach produces gastric juices. These mix with food and it changes into a
