

## How to Read Numbers

When you write large numbers, Always put them in groups of 3.  
When you read numbers you are going to read them using three groups.

000,000,000,000

To read numbers you need to read by each group of three:

**134** one hundred fourteen    **6** six    **75** seventy-five

**850** eight hundred sixty    **942** nine hundred forty-two

If you can read these you can read any large number by adding

the number group name to each set of three.

**642,010** (642 thousand 10)    **999,900** (999 thousand 900)

**740,500,400** (740 million 500 thousand 400)

**235,006,046,005** (235 billion 6 million 46 thousand 5)
