Unit _____
Lesson 11

TP: Scientists identify different types of clouds by describing and labeling a diagram.

Directions: Read the description below. Label each type of cloud.

cirrus - Thin, wispy, curly-shaped clouds.

cumulonimbus - Large, dark, towering clouds that cause rain and thunderstorms.

cumulus - Puffy clouds.

fog - Ground-hugging clouds.

stratus - Layered, horizontal clouds with a flat base.
